Expert Advisers to GROWING BUSINESSES

BDO Jawad Habib's Business Consulting division helps clients improve their competitive position by providing end-to-end solutions to transform every aspect of their business.

Our focus is on acquiring and sharing knowledge - knowledge of how to improve performance in management, business processes, operations, information technology, finance and change navigation - so that our clients can grow and profit.

Business Consulting Solutions Offering and Services

Project management

We provide clients with an objective and focused team to manage and support them through a project's life cycle. We have helped clients manage a wide variety of projects including system implementations, change management initiatives, merger-integration projects and organizational improvement.

Information strategic planning

Having the right information to make the best decision in a rapid fashion is fundamental to the success of a company in the information age. What industry experience do people need to know to do their jobs? We help clients prioritise their needs, and then sift through the myriad of technology options available today—choosing the best answers for their organizations.

E-commerce

We help clients develop and implement an e-commerce strategy that supports their current and long-term business needs. The implementation of these strategies helps organizations improve operational performance, reduce cost and improve customer satisfaction.

Enterprise solutions:

Improve inter-departmental business integration within a company to enhance business performance efficiently

Market solutions:

Help clients optimise their supply-chain operations and build on web technology to connect with the right customers and suppliers

Enterprise resource planning (ERP) evaluation & selection

In today's world, many off-the-shelf packages exist which can meet a high percentage of a company's business needs. Our experienced consultants objectively assist clients in identifying the right software, tailoring it to meet their specific needs. From groupware to decision support, from finance to sales force tracking, we address the technology aspect of improving business processes. We are the consultants of choice to help executives select new systems that meet their complex financial challenges.

Business process improvement

We help clients address their fundamental business and process management challenges and then enable those improvement programs with technology. We have adopted a family of Business Process Analysis/Management tools and methodologies which we use to optimise business processes.

Supply chain and digital markets

We help clients develop "e" strategy and capitalise on the seamless connectivity and digital marketplaces that are possible today to convert supply web efficiency into a true competitive advantage.

IT security & audit

Through our proven audit methodology, and experienced consultants, we can help you identify critical issues which may impair the ability of the IT department to react to business needs and help gain agreement on how to resolve the issues.

Internet services

We perform web diagnosis to deliver a comprehensive, comparative assessment of the client organisation's web site on the key measures of usability, design and effectiveness.

Industry Experience

Our experience covers a wide and broad spectrum of sectors and industries. These include:

- Banking (Retail, Commercial, Wholesale and Islamic banking) and Financial Services (Insurance, Stock Exchange, Investment);
- Government and Public Sectors;
- Manufacturing and Processing.

Banking & financial services

Our understanding of the financial services industry is based on our experience gained from working with world-class financial institutions throughout the region.

We have assisted banks and financial services institutions achieve their objectives of increased operating efficiencies and improved shareholder value by carrying out the following services:

- System selection and implementation;
- IT outsourcing evaluation;
- Multi-channel integration;
- Risk management;
- e-Banking strategies.

Change management

Flexibility is key to growth in today's business environment. Our change-management experts work with clients to facilitate change effectively. We teach organizations to use the skills on an ongoing basis that we use as part of a change-management process, including asking better questions, leading more dynamic teams and creating an environment that not only allows change but also fosters it. Our change-management skills are a core component of all the services we offer.

Government & public sectors

Citizens and businesses alike demand efficient and more convenient services from their respective governments and public sectors.

Our professionals have assisted governments and public sector organizations transform to meet the challenge of a changing public sector environment.

Manufacturing and processing sectors

Our specialized consultants have helped our clients to find the right solutions to meet their business challenges in areas such as:

- Reducing customer order to production cycle time;
- Providing up to the minute sales information per product line;
- Providing accurate and adequate cost information.

" BDO is one of the world's largest professional services organisations. Through our member firms we deploy over 22,000 people providing accounting and auditing, tax and consultancy services on a globally integrated basis in some 100 countries.
